

SyntheSol HP Solvent

SyntheSol is a high performance solvent that performs exceptionally well in a variety of applications; cutting heavy oils, crude, asphaltenes, lubes and greases even in extremely cold operating conditions.

CASE STUDY

Known carcinogens and inhaled toxins should be eliminated where possible to preserve the health of the work environment and the worker. Previous green solutions, although effective were expensive to maintain. **SyntheSol** would represent a step forward.

SOLUTION

SyntheSol cleaned as well if not better than traditional solvent. It was less expensive to maintain than previous green solutions and the cost per liter was not a deterrent to continued use as **SyntheSol** indeed was viable as an effective solvent cleaner much longer than anticipated. The aromatics from the parts washer are not harsh and when filtered, the **SyntheSol** remains relatively clean.

RESULTS

Continued use, technicians do not complain about any odors from the tank. No need to top up due to evaporation loss of solvent. Life cycle of product goes beyond expectations. County shop personel and admin are pleased with reducing exposure by eliminating a toxic chemical and do not see any increased costs to do so.

COST SAVINGS

- Longevity of **SyntheSol** far out weighs any increased per liter charge upfront.
- Safety profile of the **SyntheSol** reduces exposure to toxicities in the workplace with potential reduced sick time, respiratory irritation and/or long term effects of carcinogen exposure.

TIME SAVINGS

- Re-ordering down due to longevity of **SyntheSol**; managers and purchasing have cut their ordering down significantly
- **SyntheSol** works as well as traditional solvent so no time is lost due to poor performance of chemistry

PRODUCT APPLICATIONS

- Dip tanks
- Parts washers (static & circulating)
- High pressure and high temperature washers with low foaming results
- Centrifuge sample cuts
- Grease, pipe dope, lubes, distillates
- Drilling & service rigs, oil tanks, well heads
- Draw works, blocks, swivels & hoists
- Wireline trucks – equipment & tools
- Casing, drill pipe threads, filters
- Heavy oil, bitumen, asphaltenes, tar
- Underground mining – parts & equipment
- Washing pipeline pigs
